AQUARIUA 1914 1

2141 CRESCENT AVE. St. Louis, Mo.

View of Our Fish Hatchery

Located 12 miles west of St. Louis on a 40acre tract of land. Our facilities for the propagation of fancy fish and water lilies are second to none. Concrete vats 100 feet long are housed in these buildings for breeding tropical fishes. Admission by card only, which may be obtained at the office. Over ninety large concrete tanks outdoors are stocked with all kinds of water lilies and plants ready for immediate shipping.

Visitors Welcome

Our location is 6200 West and 2100

Drive to 6200 Easton Ave. and go orth on Kienlen to Bailey Place, North on Kienlen to Bailey Pone block west on Bailey Place.

Via street ear—take any street car to Wellston and transfer to the St. Peters bus. Get off at Crescent Ave. and walk one-half block North.

Our retail store is open daily from 8 a. m. to 5 p. m. Evenings by a pointment only. Sundays from a. m. until 1 p. m.

Closed on Holidays. Phone EVergreen 7265.

View of Our Lily Ponds

Hardy water lilies and many other aquatics

are propagated on a 52-acre tract about 69 miles west of St. Louis. The photograph shows

the "Sunshine Water Lilies" in a natural set-

ting. The Lotus bed can be seen in the back-

ground near the shore line. The lake is used

also for propagating game fish and we are able

to supply young crappie, bass and various sunfishes in the fall of the year for re-stocking of

private ponds.

MERCHANDISE

Only Beldt offers a complete variety of aquatic supplies. We offer a complete line of fish aquariums, remedies, fishfoods and heaters. Many features in our catalog are exclusive, such as the especially constructed heavy duty wrought iron and angle iron roller stands with heavy casters for large aquariums, so that these aquariums may be moved away from the window should the necessity arise.

For the pool we also have a very complete line of fancy goldfish, including the rare Lionheads, Orandas and Golden Orf.

You will find our aquarium plants of the highest quality, all greenhouse grown. We guarantee to send you healthy and vigorous water lilies, all true to name, at the proper planting time for your locality. No matter what you want, if you do not find it listed in our catalog, write us.

Customer's testimonials are unsolicited and may be viewed at any time.

Our facilities enable us to serve you efficiently. Our large volume of business and our many years of experience permit us to give you the highest quality merchandise at lower prices. Most all shipments are made the same day the order is received, except where orders call for seasonable supplies, such as water lilies, etc., for which we place orders on file for spring shipment as early as January and February. Order early! Do not wait until the late spring to order your lilies as we may be sold out of some of the varieties.

FACILITIES

We are centrally located and whether you live in New York City or Denver, Colo., fast express trains will reach the destination within 24 hours. We ship to all parts of the world; distance is no object

Try an order from Beldt's and be convinced of the superior quality of our merchandise.

If It Grows in Water, We Have It

If It Swims, We Have It

Our Shipping Department, Exhibition Buildings and Main Office, 2141 Cres-cent Avenue

THE SUCCESSFUL WATER GARDEN

The success with water gardens depends on quite a number of features. One of the most important of these features is sufficient sunlight and equally important is the depth of the pond. A number of subjects may be taken into consideration when you determine the depth of your pool. If you only consider the planting of water lilies, then your pool will be deep enough if you make it from 18 to 20 inches, but if you want to keep goldfish in your pool and you want to keep them over the winter, you should have a certain water depth of usually about 36 inches, and in some localities even deeper water is required. One can readily understand that everything should be taken into consideration in order to have the type of pool that will take care of your particular requirements.

Location

The location of the pool should be where it receives a lot of sunlight. Plenty of sunshine is absolutely necessary for the growth and success of water lilies and all

A pool 3 feet deep is best. In considering the depth of your pool you cannot disregard the fact that you may want to leave your goldfish in this pool over prevent the goldfish from dying all be poured at one time. over the winter.

Concrete Mixture

Use three wheelbarrows full of gravel, two wheelbarrows full of sand and one sack of cement.

Lily pool of Silas W. Rogers, of El Dorado, Arkansas, showing a nice cattails, water hyacinths and other bog plants, also tropical water lilies.

mal pool with a rough rock edge.

winter. While a 3 foot depth is too deep to plant water lilies, this depth is an absolute necessity for keeping your goldfish

This makes a good concrete mixture for the average pool. For finishing work you should use a wheelbarrow three-quarters full of sifted sand to one sack of cement. All concrete work should be in the neighborhood of six inches thick. Reinforcing of this concrete may be accomplished through the aid of ordinary chicken wire laid in the center of this concrete. The sloping walls of the informal pool have a great tendency to prevent breakage as the pressure exerted when the water freezes during the winter time is not as great as if the walls were straight. Therefore, the slanting walls really have two good features; one is that they do not crack as easily during the winter time, and the other that it is much cheaper to build the walls than if you would have to build a form to retain them

The Formal Pool

Formal pools may be constructed in all various shapes. The formal pool as a rule is built into the center of the garden or near the center. In constructing the form work for a formal pool, it is a good practice to set this form work about six inches from the bottom on small pegs of wood so that the bottom and sides can

these forms are removed, pull these small pegs of wood out of the bottom and fill them in with concrete finish when the pool is finished. This in no way will weaken the general structure of the pool. Reinforcement may be used, though the writer has never used much reinforcement in any pool. At our plant near Florissant, St. Louis County, Missouri, we have around 100 concrete tanks varying in size from 6x10 feet to 20x30 feet and the only reinforcement we used in their construction is that we lay one large iron rod about 1/2 inch thick into the center of the wall of the pond about 4 inches below the surface of the ground. The contention is that while water freezes, it exerts its most pressure on the concrete right near

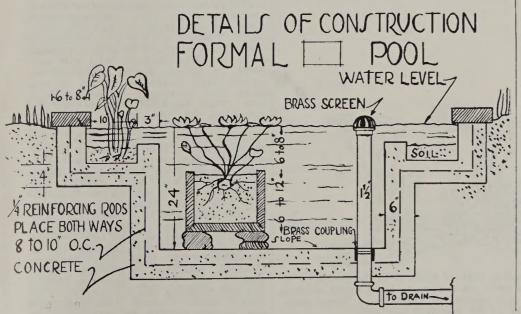

Mrs. E. T. Young of Warren, Indiana, enjoying the fragrance of water lilies in her pool.

the ground level, or as far as the pool is filled with water. It does not exert any pressure below the ice.

Lily pool of the Baybay Agricultural High School, Philippine Islands. Mr. Fred Warner, principal, writes: "Enclosed are photographs of two of our lily ponds, in which are blooming fifteen kinds of Beldt's water lilies. Of course the pictures give no idea of the color display."

fore, build the pool away from large trees and away from buildings in order that it may receive a maximum amount of sunlight. depth is all that is required to

kinds of aquatic plants. There- healthy over the winter, and in some localities even a greater depth is to be preferred. In a southern climate 20 inches of

Let Beldt Supply Your Lily Pool Requirements

and be assured that our 20 years of growing and selling water lilies and fancy fish to thousands of customers all over the world guarantees you absolute satisfaction. You will find our prices very reasonable and the water lilies which we ship all true to name and all healthy and vigorous plants. You will find our collection most complete. No other grower can offer you better quality and lower prices.

your surplus goldfish in the fall

of the year and only keep as

many goldfish in the pool as you

desire to start with next spring.

Goldfish become almost lifeless as

the water freezes. It must be re-

membered that they are cold

blooded creatures and the colder

the water gets, the less they

breathe. In fact, after the ice

once forms on your pond, you may quit feeding the fish as they

do not consume any food until after the ice has disappeared and

the water again becomes warmer.

indoors into the living room for

the winter, or keep them in the

cellar, adequate provisions must

be made to take care of them.

Most people overcrowd these goldfish and lose them. When

keeping goldfish in an aquarium

or trough over the winter, you

should not keep over two inches

of fish to the gallon of water. It

is best to keep them in a cool

place. Of course, you can keep

them in a warm living room over winter, but if the temperature is

70 or above, then at the most you

should keep only one inch of fish

to the gallon of water. If a gold-

fish is two inches long and has a

tail two inches long, then you

should have four gallons of wa-

A newly constructed pool must

be seasoned. That is, when the

pool is filled with water for the

first time the water absorbs the

lime contents in the concrete.

This is fatal to the fish as their

fins get ragged and rotten. It usually ends in Fungus which is

a white cotton like growth on

ter to keep it in.

Fish Can Not Be

Put In a New Pool

HOW TO PLANT YOUR WATER LILIES

Hardy Water Lilies

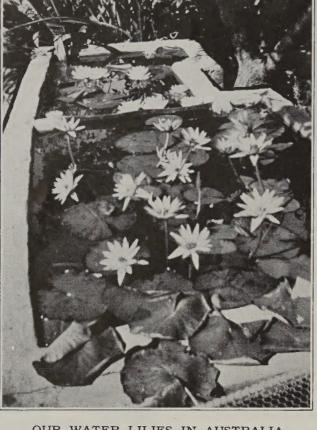

Can be planted at any depth from 12 inches to 48 inches. They will, however, do best at a depth of about 12 inches because the deeper you plant them the more strength is consumed in under water growth; also the flowers are not quite as strong if they by placing several bricks under water growth; also the flowers

clump of dirt in which you re- | rich soil and use 1/2 pint of our | ceive this tropical lily will settle down to the bottom of the box. Do not plant the tropical water lily too deep. It is best to lower the water surface of the pool so that the tropical lilies are not more than 6 inches below the wa-

derful effects may be had by using a 20 inch square box and planting two tropical lilies to one box. This will give you more flowers from one box and you can also plant different colors and improve the general appearance of your lily pool tremendously. The planting of water lilies is really not different than planting most other kinds of plants except that you set them under water. Never plant your water lilies first and then fill the pool. It is best to have the pool filled at least a week in advance so that the water has had a chance to get warm. The newly planted lilies will grow much better in aged water than in fresh water. Plants do best, and you keep your pool much cleaner, if you do all your planting in various boxes instead of covering the entire bottom of your pool with soil. Never use any kind of metal containers. The Care of Goldfish

Magic Water Lily Food to each

box. Very good results and won-

OUR WATER LILIES IN AUSTRALIA

This photograph was mailed to us by R. W. Mildred, 50 Hughes St., North Unley, South Australia. Tropical water lilies are not grown commercially in Australia. We only shipped the tubers as this was much less expensive, and this picture shows the results of the quality tubers we are able to supply. Of course it is much easier if you can set out the lily plants already developed but in Australia, when we have summer here it is winter there, and it would not have been very practical for us to ship tropical water lilies during the winter.

are planted too deep. Use good, rich soil and for each bushel of soil add one pint of our Magic Water Lily Food, which comes in one pint cartons at 35c each. This will insure a vigorous growth and will build up the soil to last for at least two or three years. It is best to lay the hard water lily root flat about 3 inches below the surface of the soil in the box and do not forget to put about 2 inches of sand on top of the box to keep the water clear.

Tropical Water Lilies

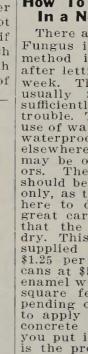

Are shipped after the weather is warm, which in the latitude of St. Louis is about May 20th. Southern shipments are made as early as the later part of March. The important thing in planting tropical water lilies is not to plant them any deeper than they have been growing in the pot. Pack the soil down solid so that the compact root growth in the pot in which the lily has been grown will not settle to the bottom of the lily box. In other words, if you leave the soil loose and plant the lilies, there is danger that the

it. Then after the lily has been growing for a month and is well established in your pool, you may lower this box. For planting tropical water lilies use boxes at least 16 inches square and 12

While we cannot go into the details of breeding and propato call your attention to a small Care," which we have listed in sent to you for 15c, postpaid. It how to prevent them. It also deof handling goldfish.

We wish, however, to bring out a few important points which everyone should know who keeps goldfish in a pool. In the average pool of three-foot depth, goldfish may be left out during the winter without any danger of loss except if the pool is crowded. That is, if you have raised a lot of goldfish and the pool is very crowded with inches deep. Fill them with good them, then you should dispose of

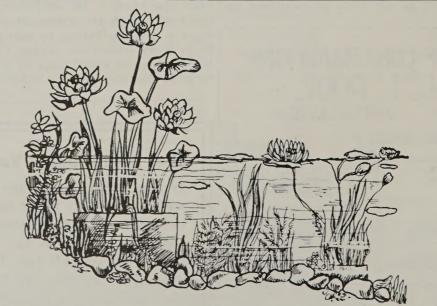

gating, etc., as this would be too lengthy a subject, we would like booklet, "Goldfish and Their this catalog and which can be describes all the diseases and scribes the breeding habits and other details useful to you in learning the successful methods

How To Prevent Fungus In a New Pool

their fins, tails, and body.

There are two ways to prevent Fungus in a new pool. The old method is changing the water after letting it stand for about a week. Three changes of water usually removes all this lime sufficiently to prevent any further trouble. The other method is the use of waterproof enamels. These waterproof enamels are listed trouble. The other method is the use of waterproof enamels. These waterproof enamels are listed elsewhere in this catalog and may be obtained in various colors. These as phalt enamels should be applied to dry concrete only, as this asphalt will not adhere to damp walls. Therefore, great care must be taken to see that the concrete is absolutely dry. This asphalt enamel can be supplied in the Black color at \$1.25 per gallon or in 5 gallon cans at \$5.00. One gallon of this enamel will cover from 150 to 250 square feet of surface, all depending on how thick you desire to apply it and how smooth the concrete work is. The thicker you put it on, the more effective is the protection it affords. Asphaltum enamel also stops many leaks as it seeps into the porous concrete. Another quality to be considered is that the asphalt enamel coating prevents algea and other slimy mosses from taking root in the concrete. The water stays clearer and does not get green nearly as quick. get green nearly as quick.

Planting things on the bottom of the pool in pots or boxes is to be preferred to placing soil directly in the bottom of the pool. It is easy to make small wooden boxes or you may use the regular fern pots which are squat shape flower pots.

They do not tip over as easy as the standard size pots.

TROPICAL WATER LILIES ... DAY BLOOMER

BLUE COLORS

Caerulea Blue

Ancient Blue Lotus of the Nile, flowers 4 to 6 inches across, carried well above the water. Price each\$1.00

Henry Shaw

Named in honor of the founder of the Missouri Botanical Gardens. Flowers beautifully blue. Delightfully fragrant. Price each\$1.50

William Stone

This is a beautiful and attractive deep blue-purple lily. The flowers are 8 inches across and star shaped. Price each......\$1.00

*Mrs. Edward Whitaker

The largest flowering day blooming hybrid from Ovalifola and Castaliiflora. Colors in shades of light blue or dark blue. Price each......\$1.00

A well-known viviparous day bloomer. The small light blue flowers are produced freely. A good plant for small pools and aquariums. Price each.....\$1.00

*Marmorata

This variety produces perhaps one of the most beautiful leaves of all tender nymphaeas. The leaves are medium green colored with large blotches and squares of brown. The flowers, which are 12 inches across, are blue on the first day they are open and gradually become lighter. (See color illustration on page 5.) Price each\$1.50

Blue Star

A beautiful deep blue variety about 7 inches across, the flowers at times are carried 18 inches above water. A very strong grower and prolific bloomer. Price each.....\$1.00

Colonel Lindbergh

A deep caerulean blue variety producing flowers up to 12 inches across which tower well above the water. The oval shaped leaves are blotched with brown. Price each.....\$2.00

*All lilies with star in front of name are viviparous, which means that young plants are produced from center of leaves. Tropical lilies should not be planted until latter part of May, or early June, and they should only be planted about 4 or 5 inches below water surface.

Gracillis Rubra (Red Star)-\$1.50 each

BLUE COLORS-Con't.

*Mrs. Woodrow Wilson

A hybrid produced from Mrs. Woodrow Wilson and Castaliiflora. A dark lavender-blue flower, 8 to 10 inches across. Price each.....\$1.25

Violet

A hybrid produced by George Pring. This plant produces distinct curly-edged leaves. Flowers up to 8 inches across are produced in abundance. Colors violet-blue. Fragrant. An outstanding recent introduction. Price each\$1.50

Wm. T. Innes

A sky blue water lily producing large 10 inch flowers in abundance, the leaves are speckled brown, does extremely well in shady pools as well as in sunny exposures. A hybrid of Zansibar rosea and Mrs. G. H. Pring. Our own creation. (See No. 2 Front Cover.) Price each \$2.00

Blue Bird

A full flowering navy blue hybrid. The flowers are 8 inches across and produced in abundance. A very good blue. N. Y. Bot. Gardens. Price each.....\$1.50

Pennsylvania (Blue Beauty)

Deep blue flowers which get a foot across if plant is given enough root space. The leaves are flowering under crowded condispeckled brown. A good plant for small or large pools. Price....\$1.50 4, Front Cover.) Price.......\$1.25 3, Front Cover.) Price......\$2.50

PURPLE SHADES

*August Koch

Produced in the lily pools at Garfield Park, Chicago, by Mr. August Koch. The flowers are purple lilac and the petals a pale violet color, 7 to 8 inches in diameter, open four to six days. Price each............\$1.50

*Royal Purple

A hybrid produced by A. S. Buskirk. A very deep red purple and a strong grower. Flowers 5-6 inches across. Very fragrant. An outstanding recent introduction. (See No. 8 front cover.) Price each.....\$2.00

*Panama-Pacific

A hybrid produced by William Tricker. The predominant color is reddish-purple and the stamens are yellow. Very fragrant and most prolific in blooms. Price each\$1.50

Imperial

A hybrid from August Koch and Caerulea producing very fragrant purple flowers about 6 inches across. A strong grower. Good for smaller pools. Free tions. Our own hybrid. (See No.

PINK SHADES TO RED

General Pershing

A hybrid from Mrs. Whitaker and Castaliifolia. The pink flowers are delightfully fragrant and open early in the morning. Strong plants. Price each......\$1.50

Zansibar Rosea

A delightfully pink shaded day . blooming lily producing flowers about 6 to 8 inches across, very free flowering. (See No. 5-6, Front Cover.) Price each......\$1.00

*Mrs. Sawyer (Independence)

A new viviparous day blooming lily, the leaves are shaded with brownish red and the flowers are very deep pink. Very vigorous and free flowering. Price each.....\$1.00

Rose Star (Mrs. Ward)

The flowers are carried well above water and get about 8 inches in diameter. They are of a beautiful rose-pink color with long golden stamens. Price each\$1.25

Gracillis Rubra (Red Star)

This star lily has wine red flowers which like the other star lilies are carried well above water. Price each.....\$1.50

Shirley Marie

A large flowering deep pink of unusual merits. The flowers are 10 to 12 inches across. Very free flowering and attractive. A strong grower. N. Y. Bot. Gardens. Price each.....\$2.50

WHITE

Mrs. George H. Pring

A new water lily, pure white in color, flowers 8 to 10 inches across. Very fragrant and prolific. (See No. 1, Front Cover.) Price each\$1.50

Snow White

A hybrid produced from the Independence through self pollenation, the flowers are carried erect on a strong stem, are cupshaped and 6 to 8 inches across. One of the best white tropical lilies. Our own creation. (See No.

NIGHT BLOOMING TROPICAL WATER LILIES

Sturtevant

The leaves are 5 feet in diameter and the white flowers are 1 to 1½ feet across. Should be planted in at least 8 cubic feet of dirt and requires a water surface of 100 square feet at least to bring it to perfection. Only for very large pools. Price each\$10.00

Lotus Dentata

The flowers are large and cup-The petals are white and pink tipped. A strong and vigorous grower. Price each......\$1.00

Devonshire

Bright, rosy red flowers, 8 to 10 inches across, flowers well above the water. Price each......\$1.00

Frank Trelease

The flowers are tyrian, pink with dark bronzy-red leaves.

H. C. Haarstick

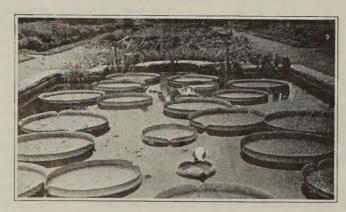

A new hybrid produced by the Missouri Botanical Gardens. Its color may be described as a rare lavender-pink. The large flowers are carried well above the water and at times attain a size of more than 12 inches. The reddishbrown leaves are a beautiful addition. Without question the finest night bloomer. Price each \$2.00

Rubra Rosea

A native lily of India, producing rosy carmine flowers, 6 inches across. The flowers are star shaped and borne freely. Price each \$1.00

Sturtevant

Mystery

These three Water Lilies photographed in natural colors are set against a background of natural color photograph of Blue Star Water Lilies in one of our pools. The Blue Star carries its flowers on strong stems about 2 feet or more above the water surface. Tropical lilies are fragrant, large and make ideal cut flowers.

Please Notice

Please Notice

Most of our tropical lilies will bloom at least one week after shipping. Lots of them are shipped with flower bids so that you may expect an immediate effect. Too often customers insist on early shipments, which is a mistake based more on inexperience on the part of the water gardener. In the latitude of St. Lonis, Tropical Lilies should never be planted before May 20. Allow is to ship your tropical lilies at proper planting time and you will never be disappointed with results.

HARDY WATER LILIES

Sunrise

Without question the finest hardy lily. The yellow flowers which are unusually large and cactus-shaped resemble a yellow dahlia. It is of a uniform yellow color and surpasses all other yellow water lilies. A great feature is the unusual fullness of the three rows of petals.

Price each \$1.50

Floating Plants for the Pool

See our complete list of floating and aquatic plants which can be used for indoor aquarium or lily pools on pages 17 and 18.

Parrotsfeather

A	beautiful	floating	plant	with
long	trailing	green fo	oliage.	
Each	1			.\$0.15
Per	dozen			. 1.00

Water Hyacinth

The old fashioned favorite floating plant, native to Florida. Produces beautiful lilac-blue

Eacl		\$0.10
Per	dozen	.75

Salvinia

A beautiful small floating plant which turns red when exposed to strong sunlight.

Shell Flower (W. Lettuce) and Water Hyacinth

Water Lettuce (Pistia Stratiotes)

The velvet green leaves form a rosette. They love plenty of heat and partial shade.

Duck Weed

An old favorite. The small foliage is also greatly relished by goldfish and acts as a tonic.

SHALLOW WATER PLANTS

Water Nasturtium or Water

Thrives in sun or shade; ideal near a cold spring. Edible, hardy. Rooted plants.

Eacl	ı	 	\$0.10

NELUMBIUMS (Egyptian Lotus)

Lotus in My Pool

Photograph of Our Water Lotus

Our Lotus bed covers about three acres. It is best to plant Nelumbiums after the water has become warm, not before May 20, except in the south, when they may be planted after April 15. They should be planted in tubs 24 inches in diameter or boxes containing 12 inches of rich soil. The box should be 12 inches below water surface.

Cyperus Papyrus (Paper Plant) Small plants, each...........\$0.35

Large clumps, each..... 1.00

Per dozen. \$0.50 Per 100...\$2.00

This photograph was taken by Mr. William G. Schumm, La Porte, Indiana. Mr. Schumm is well pleased with the Egyptian Lotus he received from us, and he advises that he left the plant out in the water tub all winter without any protection.

HEMEROCALIS FULVA

Magic Water Lily Food Beldt's Magic Water Lily Fer-tilizer and Plant Food

Has been perfected after years of experimenting. Magic does not foul or sour the water in your pool and leaves it absolutely free of foreign colors. In our experimental pools Magic Water Lily Food proved that flowers will double in size and that especially newly planted water lilies and all other aquatic plants will make as much growth in one month as they would in two months if planted in ordinary soil. Use 1 pint of Magic Water Lily Food to mix with 1½ bushels of soil. Complete directions with every carton.

1	pint	carte	ons,	each	\$0.35
5	lb. k	oags,	eacl	n	1.05

Redwood Water Lily Boxes

These boxes are shipped knocked down and can be nailed together by anyone in a few minutes. They are cut from durable California Redwood and will last a life time under water.

These boxes also make wonderful boxes for propagating white worms. Prices do not include postage or expressage.

Size	Deep	Long	Wide	Each
No. 1	8"	10"	10"	\$1.00

Asphaltum Enamel

A new pool does not have to be seasoned if the pool is painted one coat of asphaltum enamel. The concrete walls must be perfectly dry when applying this enamel. Just give it one good coating, let it dry 24 hours and it is ready to be filled. Black asphaltum enamel also has the advantage of keeping algea from forming on the walls. We can supply this enamel in black, green and blue. One gallon of Asphaltum enamel will cover a surface of about 150 sq. ft., all depending on the smoothness of the concrete finish.

Per quart. Black	30.35
Per gallon, Black	1.25
In 5-gallon cans, Black	
Per gallon, Green or Blue	4.00
Per quart, Blue and Green	

We do not pay expressage on pool paints.

Wooden Water Troughs

These Redwood troughs are These Redwood troughs are ideal for putting goldfish eggs in to hatch or to bury in the ground for a small pool. They are coated on the inside with asphaltum so that they are absolutely waterproof and do not require seasoning.

These troughs are also good for over-wintering goldfish and plants in the cellar.

Size 5 ft. long, 1 ft. high, 2 ft. wide. Price Each \$6.00

Made from 2-inch thick Redwood.

POOL PAINTS AND FERTILIZERS

Colored Lily Pool Paint

We highly recommend Sealment Water Proof Paint especially prepared for cement walls and lily pools. After testing many materials manufactured for this use we selected Sealment as the best. If Sealment is mixed properly and applied according to complete directions which are furnished with every can, it will last as long as the pool itself and forms a part of the pool and not merely a surface coating. It is ideal for stopping leaks in pools. Sealment contains no poisonous chemicals, however, on account of lime content, pool must be seasoned with change of water before placing fish in same. Sealment Water Proof Pool Paints can be supplied in following colors:

White, Blue, Green

Price	per	5	lb.	can	for	all
colo	rs ez	c ce	ept	Green	1	\$2.00
Price	per	5	lb.	can.	Gree	n 2.50

Directions

Five lbs. of Sealment Pool Paint will cover 50 square feet. Sold only in 5 lb. cans and we can not supply this in any other quantity. You will find complete directions for use with every can.

Hopkinsville, Ky.
My orders of water lilies, etc., arrived in grand shape. Thanks.

"LOTUS IN MY POOL"

"LOTUS IN MY POOL"

This photograph was sent in by Mr. Sam Caldwell, of Nashville, Tenn. For larger pools having enough space for the planting of lotus (a box 24 inches square and 12 inches deep is sufficient), they can be highly recommended. They are very hardy and multiply rapidly. While many plants do not bloom the first year, quite often plants will make several flowers the first season. first season.

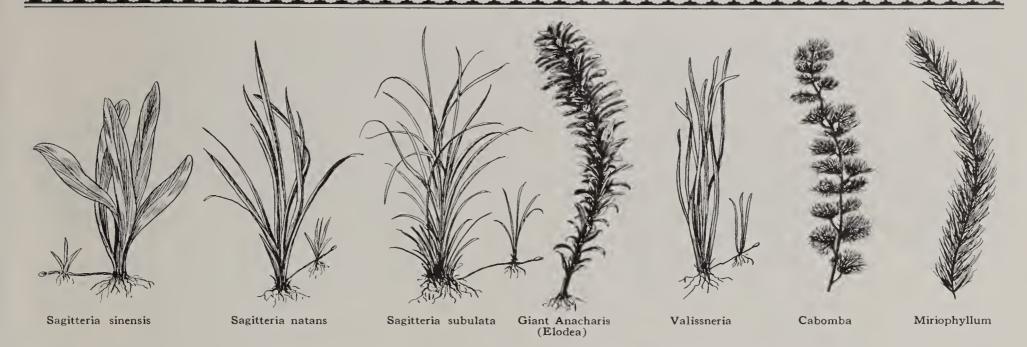

This lovely pool belongs to Mrs. Kirstine Parker, Tremonton, Utah. Mrs. Parker was more than satisfied with plants received

Irs. Clifford Nordberg, Abnandale, Minn., sends this picture of her pool and writes:

Dear Sir: My first pool and lilies have been such a success that I feel I must share a little of my joy with you, since my lilies came from your firm. The lilies were just beautiful and bloomed all summer. My Blue Star had as many as three flowers at once and at least four other buds ready to open. Mrs. Sawyer was also beautiful and bloomed all summer.

A beautiful green mossy foliage; plants grow in clusters at the bottom. Nice for spawning. Per portion.....\$0.35

Potomogeton densus

A fine bunchy growing plant which floats near the surface affording protection to young fish. Per portion \$0.25 Each

Bacoba

A green foliage plant, very similar to Ludwigia, except that the leaves are more fleshy and rounded.

Per bunch......\$0.15 3 for.....\$0.40

Ceterophyllum

Common name, horn wort or Marestail. It is easily grown and provides a fair protection to newly born fish.

Per bunch.....\$0.15 6 for.....\$0.75

Cellophane plant

A newer aquatic with light green nearly transparent leaves. Each......\$0.35 3 for......\$0.90

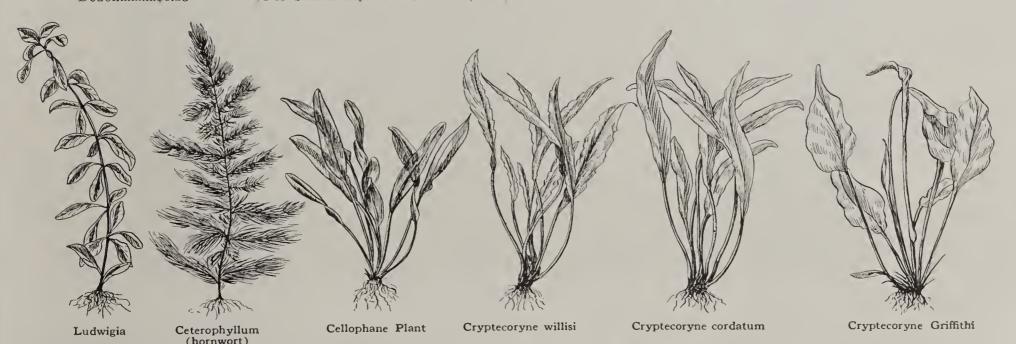

Nephthytitus liberica

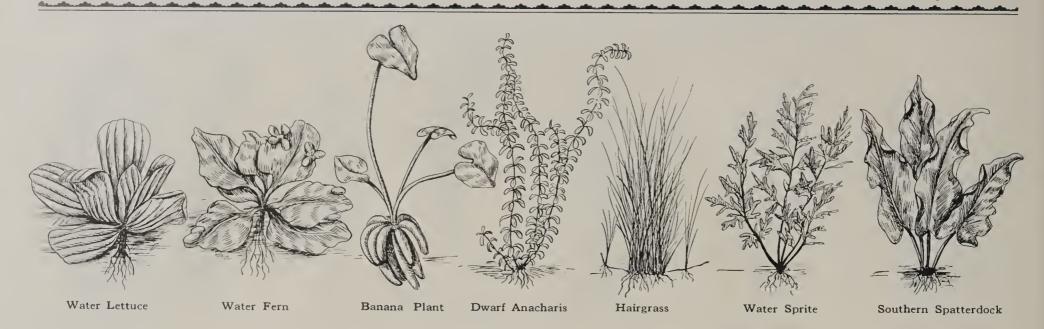

Aquatic Arrowhead. A nice plant with arrow shaped leaves which prefer to grow above wa-

Each......\$0.25 3 for.....**\$0.60**

Madagascar Dwarf Aquarium

Makes nice blue flowers above water. For tanks over 10-gallon capacity. Must be grown in pot with soil.

TRY BELDT'S GREENHOUSE-GROWN PLANTS IN YOUR AQUARIUM

Water Sprite

A fern-like plant of light green foliage which is of recent intro-duction and has made many friends friends.

Each......\$0.25 3 for.....**\$0.60**

Dwarf anacharis

A dwarf variety of elodea especially suited to smaller tanks but equally effective in larger aquariums.

Per bunch, \$0.15. 3 for \$0.40

Southern spatterdock

A beautiful foliage plant which has a delicate light green color. 3 for.....\$0.50 Each......\$0.20

Round leaf spatterdock

A smaller variety with round leaves.

Each.......\$0.15 3 for......\$0.40 Dozen......\$1.25

Hairgrass

A well-liked small dense growing grass which forms small leaves about 4 inches long.

Per portion \$0.25

Banana plant

A novelty plant which is very popular. Grows from the seeds of the snowflake lily, the seed formation growth resembling a miniature bunch of bananas from which the leaves sprout.

Each......\$0.15 4 for.....\$0.50

Echinoderus Radicans

Formerly known as sagitteria guyanensis. Broad green leaves, 5 inches long, are produced from a single root growth.

Each

Water Snowflake

A lily-like aquatic plant; the leaves float on the water surface; requires sufficient sunlight.

Each

Aponogeton fenestralis

Madagascar lace plant, the finest and rarest of all aquatic plants. The thick leaves form a lacy perforated growth.

Aponogeton Ulvaceum

A beautiful aquatic plant of recent introduction belonging to the Madagascar Lace Leaf family. Beautiful light green leaves about 5 inches long, forming a rosette.

Each

Aponogeton Crispum

Also of recent introduction, produces medium green, curly edged leaves, all of which grow from a center root. A very attractive plant tractive plant.

Each

Under Water Palm

An aquatic plant which produces palm-shaped spikes which grow similar to the Umbrella palm.

Per portion.......\$0.25

Amazon Sword Plant

The foliage is similar to sagitteria sinensis only stronger and the growth is more symmetrical and many more leaves are pro-

Each........\$0.35 3 for......**\$1.00**

Brazilian Under Water Fern

This plant of recent introduction produces waxy green leaves about 4 inches long.

Each

Potomogeton Crispus

A plant similar in growth to Ludwigia, except the leaves are long, much like cryptecoryne willisi but the plants grow more compact.

Per bunch....\$0.15 3 for....\$0.40

Fanciers' Special Collections

Collection No. 1

A 5-gallon aquarium collection of assorted plants, postpaid \$0.65

Collection No. 2

fine collection of aquarium plants for 10-gallon aquarium.

BOG PLANTS

Plants which grow above the water, but roots must be submerged in flower pots. All suitable for aquariums indoors.

Umbrella Palm

The most popular of these va-

Each

Spiral Palm

Similar to Umbrella Palm, except that the leaves grow in perfect spiral shape.

Hedychium coronarium

A beautiful foliage plant similar to water canna; easily grown if pot is kept in water. This feature applies to all of these bog plants. Try some of them.

Each........\$0.35 3 for......**\$1.00**

Supreme Collection

Read These Directions When Ordering Goldfish

Goldfish are shipped via express. We ship in small caus up to 24 of the smaller sizes. These small cans are not returnable and 35c should be added to your order for this can. We ship 50 fish in a 5-gallon shipping can. These cans cost 60c each and are not returnable.

Orders calling for more than 50 fish are best shipped in large galvanized goldfish cans, holding 10 gallons of water. A \$3.00 deposit is required on these cans, which must be returned, 20c prepaid, from anywhere in the United States.

We guarantee live delivery on all goldfish. If shipment should arrive in bad order, notify claim department at once, get an inspection report and mail this to us together with the empty can and we will replace lost fish, express charges prepaid. If, however, the loss constitutes a value below 50c, then keep the report, send it to your local claim department for collection of value of loss. Kindly understand that unless we make a minimum provision so low as a 50c loss, it is merely to prevent claims that may amount to only 10c and the time and postage consumed in that case would be many times the actual value of loss.

SCAVENGERS FOR AQUARIUMS AND POOLS

Do not try to keep an aquarium or a pool without the proper kind of scavengers. They are very im-portant in keeping an aquarium or pool clean. Clams should never be used in an aquarium. They should only be used in pools, as the average aquarium is much too small. Figure at least one snail to the gallon of water when keeping an aquarium, and if you use the large Japanese snails, use at least a dozen snails for each 50 gallons of water in the pool, and figure one Weatherfish for each 10 gallons of water in the aquarium besides the snails.

Water Newts or Salamanders are very interesting, but have no scavenger value. Tadpoles make very good scavengers in both pools and aquariums. Scavengers consume very little oxygen and, therefore, will not overcrowd the aquarium.

Add 15c postage for snail orders amounting to less than \$1.00.

ADMISSION BY CARD ONLY

View of one of our many breeding houses View of one of our many breeding houses at our hatchery located 12 miles west of St. Louis. You are cordially invited to visit our hatchery, which is located on a 40-acre tract of land one mile north and about one mile west of the St. Louis Airport. Over 80 ponds outside present a mass of blossoms of various colors of water lilies during the summer months

Our hatchery is closed Sundays and Holidays.

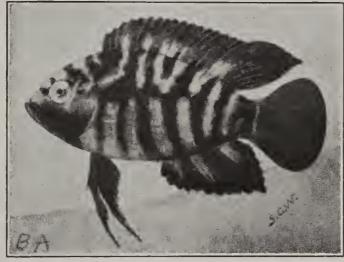

How We Ship Tropical Fish

During the summer months tropical fish are shipped in plain metal eans. Add 35c to your order. If the weather is cold and during winter months we pack these cans especially protected against cold weather in a special insulated carton. During cold weather add 25c extra for winter packing or a total of 60c for the shipping container. These containers are not returnable, but as they are very light in weight, they reduce express charges.

We also ship in special thermos shipping cans during cold weather. These cans are returnable and a \$3.00 deposit required on these is refunded if the container is returned within seven

A rental charge of 25c per week is made against the deposit on special thermos cans held longer than one week after receipt of shipment. We guarantee live delivery, but do not assume responsibilities for losses after shipment is received in good order. If a shipment arrives in bad order and there should be any dead fish in the can, call the Railway Express Agency Claim Department same day as shipment is received. Get an inspection report and mail this to us.

Be sure to take the water temperature during winter months and have this recorded on this inspection report. We will then replace the fish which were lost express charges prepaid. We cannot consider claims unless the loss amounts to \$1.00 or more. If losses are less than \$1.00, claim should be filed against earriers by you.

INTERESTING BOOKS FOR THE FISH FANCIER

"Exotic Aquarium Fishes." By WILLIAM T. INNES

This 460-page book with 41 color plates and 290 black and white illustrations is one that everyone interested in Aquarium Fishes should own. It contains only such fishes that have actually been imported, giving the popular name (if any), the scientific name, its pronunciation and meaning, the native habitat and a key reference to a world map, which is printed on the fly-leaf. There are also 7 maps which show the world distribution of the 7 most important families of Aquarium Fish; 78 pages are devoted to Aquarium Management, Plants, Diseases, Enemies, etc. There are also sections on Wholesale Breeding, Collection and Transportation, Miscellaneous Information, and Rules for Fish and Aquarium Competition.

I received some fishfood which I liked very much. The meat flakes seemed to make the young fish grow so much faster.

EUGENE SPICER.

SILVER BRAND FISH FOODS

A good fishfood is essential to keep the fish in good health. Our "Silver Brand" fishfoods are the finest scientifically prepared foods for all aquarium fishes. We have years of experience breeding tropical and goldfish, and inferior foods result mostly in sick fish, lost colors and run down conditions. Many fanciers are not aware of the fact that a poor fishfood results in diseases which no remedy will cure, because the fish are too run down to respond to any treatment. In many cases only a good fishfood is all that is required to bring them back to health instead of a lot of chemical preparations. Request your dealer to stock our foods and do not accept inferior brands made by people who never owned a fish in their lives. All of our high grade fishfoods, put up in glass jars to keep them fresh and moist, do not contain any kind of filler such as meal or flour to produce quantity instead of quality. Most of these fillers produce constipation and the fish are soon run down and subject to all kinds of diseases. Stop using them and you will have better and healthier fish.

South Byron, N. Y.

I have had very fine results with your Gold and Tropical Fish Tonic in starting new aquariums and keeping goldfish in my pool healthy during the winter.

MRS. EVA BOATFIELD.

AQUARIUM MANAGEMENT

Aquarium Management

Aquarium Management

Never use gravel or too many shells for the bottom of an aquarium. Food and refuse will accumulate among them, because fish and scavengers have no access to it. It will cause the water to spoil and roots of plants to get black, and acid conditions resulting in the death of your pets. Use only clean river sand, one that is not too fine, yet not too coarse. Never place the fish in fresh water, it contains too much oxygen, also too many chemicals. After aging water for about a week, it is much safer than fresh water. A positive prevention against disease is to heat the water and let it age for about a week. All danger of ich can in this way be eliminated. Never keep the water in any kind of metal containers. Green water is caused by excessive sunlight or insufficient plant life. Two or three hours of direct sunlight per metal containers. Green water is caused by excessive sunlight or insufficient plant life. Two or three hours of direct sunlight per day is not too much. If the aquarium gets green it will clear up if covered with brown paper. Also floating plants help keep it clear. If you can not provide an eastern or southern exposure get an electric reflector and let it burn at least two hours in the evening; it stimulates plant growth. Bad smelling water is is

or the wrong killar. Bo not underpestimate the value of sufficient plants and some scavengers. When cleaning your acquarium try to save as much of the old water as possible. Strain it through a towel and use it over as it is much safer than too much new water never gives any ill effects even if it has not been aged, just so it is tempered properly. Occasionally syphon off the dirt on the bottom and replace it with fresh tempered water; this is more beneficial than harmful. It is best to keep two aquariums, one to use for quarantine purposes of newly purchased fish. Observe them for a week before placing them with your valued stock. When you get fish via express save all the water in which they come, and add old water to same. This will minimize the difference in chemical contents of the water. It also is a good precaution to add two drops of fungus remedy to the water. Good, clear water in an aquarium is very essential. It contains more oxygen and creates a better plant life. Plants absorb the impurities which create carbonic acid gas and throw off oxygen which the fish require. Therefore, a balanced condition can be created by

the result of either too much food or the wrong kind. Do not underestimate the value of sufficient plants and some scavengers. When cleaning your acquarium try to save as much of the old water as possible. Strain it through a towel and use it over as it is much safer than too much new water. As a rule one-third new water never gives any ill effects even if it has not been aged, just so it is tempered properly.

keeping a certain amount of plants and fish life in an aquarium, and such an aquarium does not have to be cleaned more often than once in six months to one keeping extremely simple. Automatically controlled aquarium heaters are perhaps the greatest benefit ever devised for the troplant plants and fish life in an aquarium cover and like the water as possible. Strain it through a towel and use it over as it is much safer than too much new water. As a rule one-third new water never gives any ill effects even if it has not been aged, just so it is tempered properly.

are more necessary than most fanciers realize. How would you like your dinner spread all over the table? Feeding rings help keep the aquarium clean. Glass covers are necessary on all heated aquariums, they help to retain the heat; many tropicals also like to jump out. A few bushy floating plants such as Utricularia minor (Bladderwort) or potomogeton densus in which newly born fish may hide prove one of the best paying investments. Do not be pennywise and pound foolish. Before investing a dime in fish, secure the proper equipment to keep them. Too many beginners make the mistake and invest \$3.00 in a cheap tank and heater and seven dollars in fish. If this investment were reversed, you would profit in the end. Do not try to start the fish hobby without first reading a reliable book on this subject. Investigate before you invest.

Demand Our Goods From Your

Demand Our Goods From Your Local Dealer

Many dealers carry our supplies, such as foods, aquariums, fish, plants, and supplies. If your dealer does not stock them, demand them, and he will be only too glad to stock them for you. We shall be glad to have your dealer's name and address.

Meramec Sand for Aquariums

It is very important to use the right kind of sand for the bottom of an aquarium. Meramec sand answers this purpose. White sand packs too tight and does not allow the roots of plants to grow right; on the other hand, if sand is too coarse, fishfood and refuse collect among same, causing water to decompose and get cloudy. Meramec sand is put up in the following size packages:

Size	' I	Cach

Chromalox Aquarium Heater

110-120 Volts

This is a heater for large aquariums. Has an overall length of 12 inches; width 21/2 inches. Will maintain a temperature of 75° F. in aquariums up to 50 gal-

Three paramount virtues of the Chromalox heater: Sensitive, nonradio interfering, and sealed thermostat. Heavy brass tube chromium plated. Chromalox element. Water-proof mounting to keep drip water from getting into mechanism. The mounting must be kept above water level. Guaranteed for one year.

Price each ... \$6.50

NO. 1 HEATER PRICE \$5.75

No. 1. Automatic with pilot light indicator has a double socket, and two heaters can be used thermostatically for two different aquariums if desired. Also two heaters can be used in one aquarium, that is if the aquarium has a capacity of 50 gallons or more, two heaters would be necessary to heat it efficiently if the very large aquariums are kept in cold rooms. Each heater will heat aquariums from 10 to 45-gallon capacity. This immersion heater is constructed with a special chromalox element. The element is guaranteed for one year. No. 1 outfit furnished complete with one heater as illustrated.

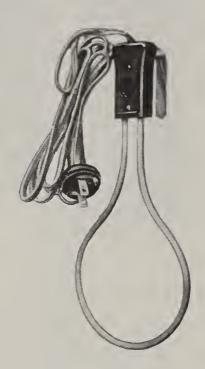

Price				\$5.75
Additi	onal	heaters	oach	() mm

No. 2 HEATER PRICE \$4.00

This No. 2 heater is built into one unit complete with thermostatic control, which is enclosed in a 6 in. x ¾ in. glass tube. The heating element housing is made from heavy copper tubing which is nickeled, then chromium-plated. They last quite a number of years continually submerged in water. A good feature not to be overlooked is the fact that the heating element can be easily replaced for only 35e postpaid in ease it burns out. A very popular and serviceable heater for aquariums holding 15 to 35 gallons of water. No. 2 heater is built into

GUARANTEED ELECTRIC AQUARIUM HEATERS

Glass Tube Heater

These Glass Tube Heaters are supplied with waterproof tops, rubber suction hangers, and complete with plug and 6-foot extension cords.

6-inch heaters can be supplied in following wattages: 10-watt, 20-watt, 30-watt, 40-watt. Price complete, each......\$0.85

8-inch glass tube heaters can be supplied in 40-watt, 60-watt, 80-watt. Complete as illustrated.

Do not compare this new type glass tube heater to the old sand filled type. The glass tubes are strong and can stand 800° F. without breaking. The special michrome element is entirely enclosed in copper which is rust resisting and a quick conductor of heat, giving this low priced heater all of the quality of a higher priced article.

ARE BELDT'S HEATERS SATISFACTORY?

Kingsport, Tenn.

I have been ordering from you occasionally for two years and found my dealings with you have always been pleasant. MRS. J. W. HARRISON.

Deer Park, Wash.

I sent to you for an aquarium last fall and have been real pleased with it.

MRS. S. SAWYER.

Norman, Okla. I'd like to express my sincere thanks for and appreciation of your excellent service during the year of 1938. I've been very much satisfied with your ship-MICHAEL IVANOFF.

Walla Walla, Washington,

It might interest you to know that the aquarium, thermostat and heaters I bought from you about five years ago are all working still. No leaks in the aquarium, and the electric equipment giving excellent service.

JOHN PEMBERTON.

Youngtown, Ohio.

I found the heater which you sent

MR. WALLACE DILLON.

Submerged Aquarium Reflector

This reflector is made to hang on the inside in the aquarium. It is five inches long and one inch in diameter. Besides light, it also produces a little heat which makes it very practical for tropical aquariums. Supplied complete with bulb, rubber hanger and rubber extension cord.

No. 6

The "Watchman" **Automatic Glass Tube** Heater No. 6

This automatic heater is designed for aquariums from 4 to 20-gallon capacity. The thermostat is set to maintain a temperature of 76° F. However an adjustment is possible by turning the small set screw on the back plate. A fraction turn to the right increases the temperature.

Price each......\$2.00 3 for 5.60

All of Our Automatic **Heaters Are Fitted with Condensers to Prevent** Radio Interference

THERMOSTATIC CONTROLS AND AIR RELEASERS

Condenser Plug

Each 35c, postpaid

For the elimination of Radio interference, to be used with any type of thermostat you now have.

Note

When adjusting these thermostats, a fraction turn to the right increases the temperature and to the left lowers the temperature.

Schickerling Ultra Violet Lamps

These new patented Ultra Violet Lamps will operate on 110 volts A. C. or D. C. currents. Tropical fish and plants can be kept without sunlight in good growing condition and healthy. If you are unable to keep your fish in a southern or eastern exposure this is just what you need. For the winter months they are indispensable.

You will no doubt recall that I am an old customer of yours and have had several shipments of tropical fish. Your stock has come up to my expectations in every case.

R. C. PRATER.

Toronto, Ontario, Canada.

Very pleased with condition of your fish on arrival in Toronto. Considering that we are in the 5th zone, it is remarkable as I haven't lost a fish.

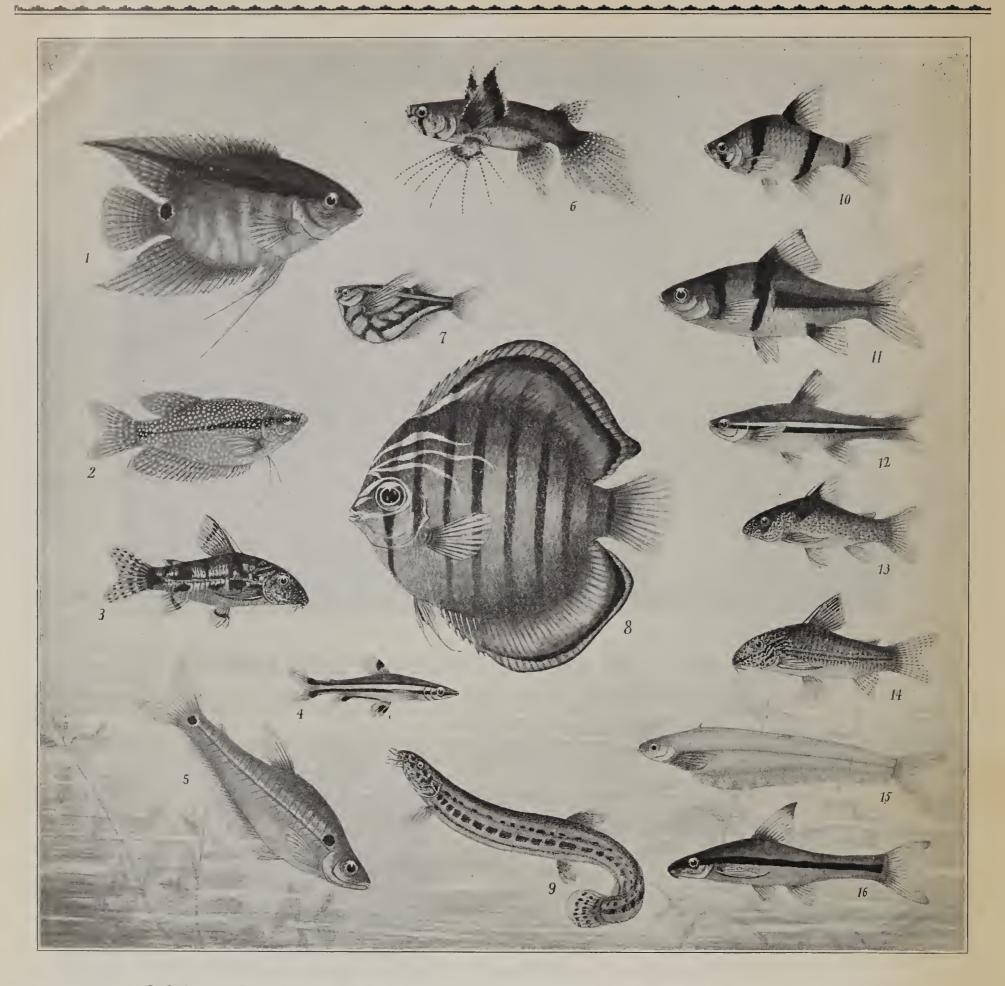

J. R. CLAPP.

Ashton, South Dakota.

My friend has five aquariums stocked with your fish and they are the best collection I have ever seen. MRS. RAYMOND HAGMANN.

Tyndall, South Dakota.

Fish arrived Saturday evening, everything Oke, and none dead. They are a nice bunch of fish. S. G. BERRY.

A SUGGESTION

When ordering plants or fish, it is well to remember that snails can be sent along either in water or packed in damp moss with plants at no additional carrying charge.

DIRECTIONS TO CUSTOMERS

WHEN WRITING IN REGARDS TO YOUR ORDERS

BE SURE TO MENTION ORDER NUMBER

Forwarding

All shipments of live stock are forwarded via express; also all glass articles. We guarantee glass articles only if forwarded via express and in case of damage in transit will replace all articles gratis only if a bad order is obtained from express company and mailed to us. We do not pay express charges on replacements or on original orders. We do not guarantee live stock sent through mail.

We do not pay postage or expressage on any shipments. All price quotations in this catalog are strictly net F. O. B. St. Louis except on items listed postpaid. Do not remit any money to cover express charges as these are collected when the express man delivers the goods. If you desire items sent parcel post, make your remittance large enough to cover postage. We can not guarantee parcel post shipments against damage or loss.

Correspondence

We can not give detailed information concerning breeding habits, etc., of fish. In order to properly do so would require hours of writing concerning some of the varieties. Include with all inquiries a self addressed and stamped envelope.

Claims

We can not entertain claims unless they are made within 3 days upon receipt of shipment.

Cash with Orders

Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50 per cent remittance be made to guarantee acceptance.

Shipping Cans

See directions for Goldfish shipping cans on page 21.

Directions for Tropical Fish Shipments and Shipping Cans on Page 25

Shipping Season

We ship everything listed in this catalog all year around. During cold weather tropical fish are shipped in thermos cans. We reserve the right to delay orders, should weather conditions arise that may call for delays on shipments, and such delay, in no way, should be a cause for cancellation of orders.

Canadian Shipments

Obtain a permit to import plants from the Department of Agriculture, Ottawa, Ontario. Send us permit number. You keep the original copy of permit.

Non-Warranty

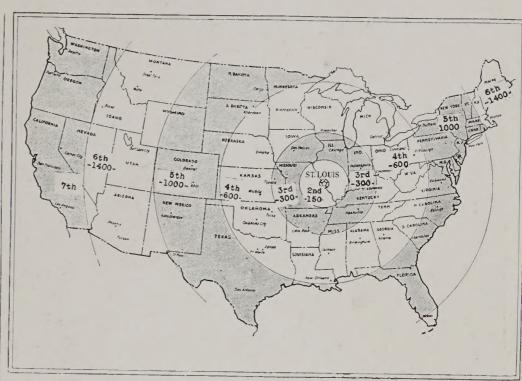

Various conditions, such as unfavorable weather, improper planting, etc., may cause poor results. We send out only first quality stock, but we give no warranty as to productiveness or description.

Selecting Tropical Fish

Not all varieties listed can be shipped in one can. Customers desiring only such varieties that can be kept together in one aquarium should order those marked * which are known as "Happy Family Fish."

Pairs

Quite often a fancier wishes to match odd fish in order to pair them. You can purchase either sex at one-half the catalog price as quoted for pairs, except Veiltail Bettas.

How to Figure Transportation Charges.

An average order for tropical or goldfish weighs from 10 to 20 lbs. In order that you may determine express or pareel post rates from St. Louis we are listing below 5-lb. pareel post rates and 20-lb. express rates.

Approximate Express Rates on Live Fish

	2nd Zone	3rd Zone	4th Zone	5th Zone	6th Zone	7th Zone
5 lbs.	.25	.30	.35	.45	.60	.60
10 lbs.	.31	.40	.50	.65	.94	1.06
20 lbs.	.51	.60	.83	.98	1.78	2.01
50 lbs.	1.12	1.34	1.92	2.30	4.28	4.86
100 lbs.	2.04	2.48	3.63	4.40	8.36	9.51

Approximate Parcel Post Rates on 5-Lb. Packages

50	50 to 150	150 to 300	300 to 600
miles	miles	miles	miles
9e	13c	17e	24e
600 to 1000	1000 to 1400	1400 to 1800	Over 1800

Goldfish Food Special Pool Mixture

For Large and Small Goldfish

Per lb., postpaid \$0.50
Three lbs. for \$1,25

Medicated Aquarium and Pool Neutralizers

These medicated water neutralizers are necessary to counteract acid conditions in aquariums or pools. For aquariums, just use one at the time.

If water is acid they gradually disappear, depending on the amount of acidity in the water. For pools, they may be used one for each 100 gallons of water. They do not injure plants or fish; they only help to keep the water fresh and from becoming too acid.

Price postpaid 6 for 50c; Dozen, 80c

F. O. B. St. Louis, 50 for \$2.00; 100 for \$3.00

COLLECTION No. 5

The gold helleri or swordtail grows similar in size to the well known Mexican Swordtail. It differs in color only. No. 2 and No. 4 show the variations in colors of the Betta from Cambodia (Cambodia is a small state near Siam in China). No. 3, the blood red moon, is well known and is a live bearer, the same as the gold helleri. No. 5, Pearl danio, scientifically known as the Brachydanio albolineatus, more commonly known as the Mother of Pearl fish, is a native of India, very hardy and an egglayer. All of these species are ideal community tank fish and peaceful. Two Betta males, however, cannot be kept in the same tank. They are also known as Siamese Fighting Fish.

Collection No. 5

Special Collection Price.....\$2.75
Shipping container extra.

This Collection can be kept in a five-gallon aquarium.

NEW FANCY COLORED VARIATUS

The red males vary in colors and designs like the original variatus. The most remarkable thing about the black variatus No. 49 is the fact that they breed 100 per cent true with only minor color variations. It is the only fish known where all of the male babies are born black and the females white, and also the only fish on which the sexes may be distinguished at birth. The red variatus is hardy and able to stand temporary temperatures of 45° F.

Price—Any Color
